INTRODUCTION

Smart Timesheet (STS) is used for Employee to enter actual hours worked on allocated job and leave taken on a monthly basis. Each employee is to record their own time from the individual user id given to the employee. The approval and rejection access of the timesheet and leave application of the employee will be handled by the respective Manager of the employee. The CEO of the organization will have the complete control over the STS where, they can view and edit Time tracker entries that includes time-logs, leave settings, projects, jobs, and clients. In this manual we will discuss about the steps to follow to operate STS for admin module.

1. ADMIN LOGIN

Admin has the highest level of access to the website. The following works can be done by Admin.

- Admin can create a User Id for the employees and Manager working in the organization.
- Admin can view the employee list along with their details like their name, designation and their manager.
- Admin can store the details of the client.
- Admin can formulate a leave setting to the organization based on rules and regulations related to various types of leaves that an employee can avail of.
- Admin sets the types of leave like Annual leave, Monthly Leave, Personal Leave, Medical Leave, eternity leave etc., along with the number of days, description of the leave.
- Admin will assign the project to the employee along with the project leader.
- Admin can view and store the project details like Project Name, Client Name, Start date, End date, Project leader etc.,
- Admin sets all the public holiday of the year with details like Holiday Name, Date, Day, Country etc.

USER GUIDE FOR ADMIN

The user guide for admin will help in understanding the features present in the admin website.

1.1 LOGIN TO STS ADMIN WEBSITE

1. Login screen is the first screen. The user has to enter the login credentials for login.
2. Enter the **Username*** and **Password***.
(* - This symbol indicates the mandatory field).
3. After the successful login, admin will enter into the STS dashboard.

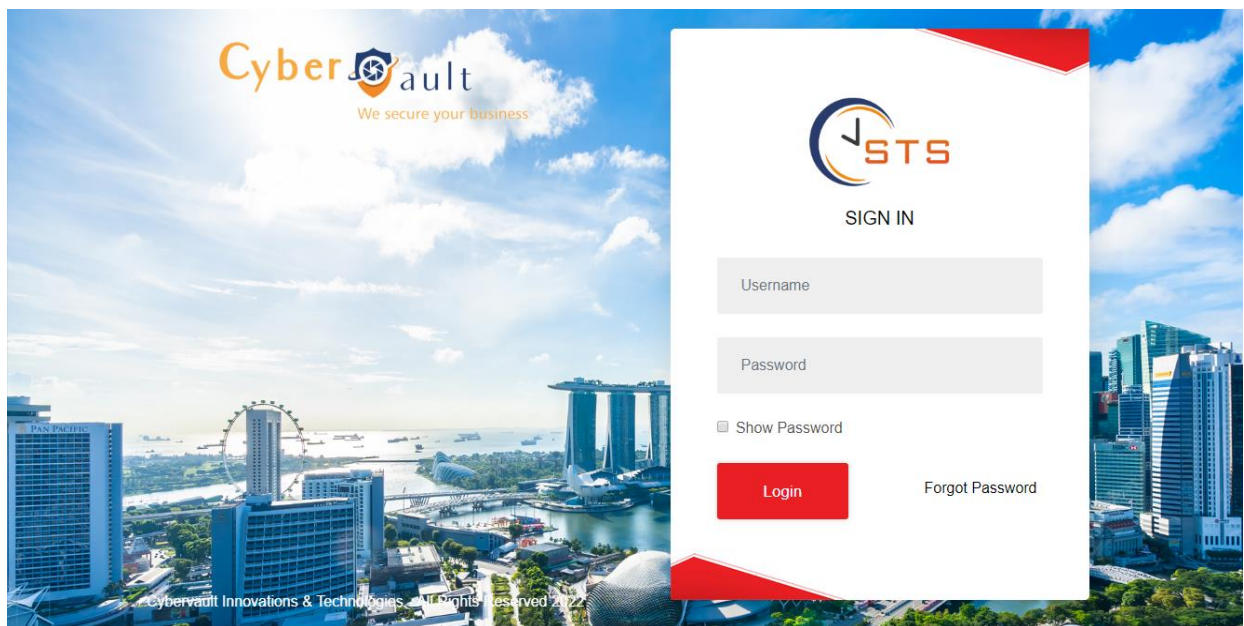

Fig 1.1 Login Page – Admin

1.2 DASHBOARD

1. After login the following dashboard will be displayed to the employee login as shown in the below figure 1.2.

2. Dashboard contains the No. of employees, Pending time entry and the pending leaves.

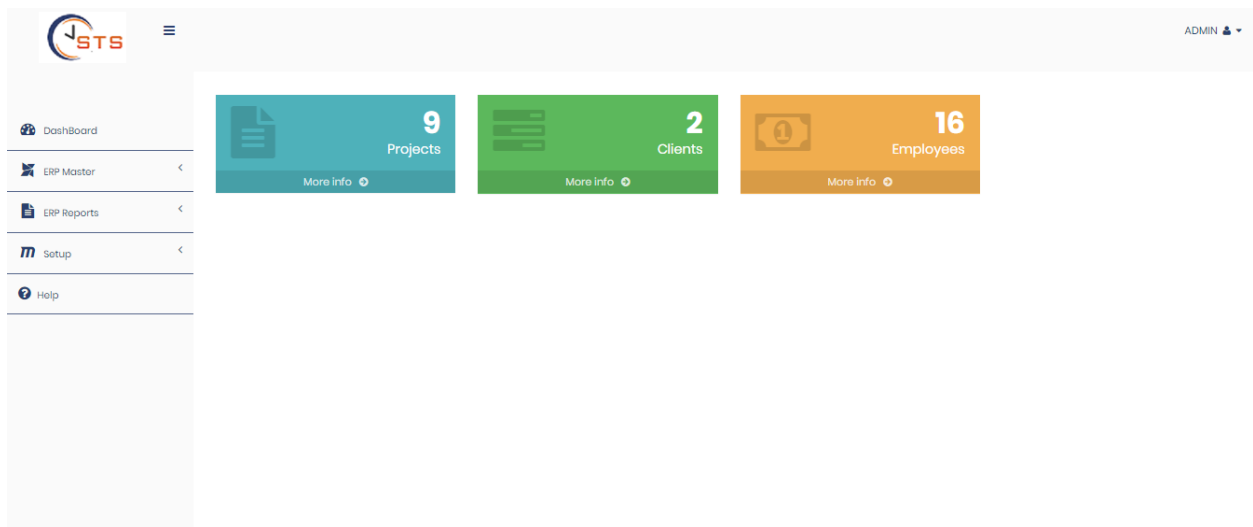

Fig 1.2 Admin login page

PROJECTS

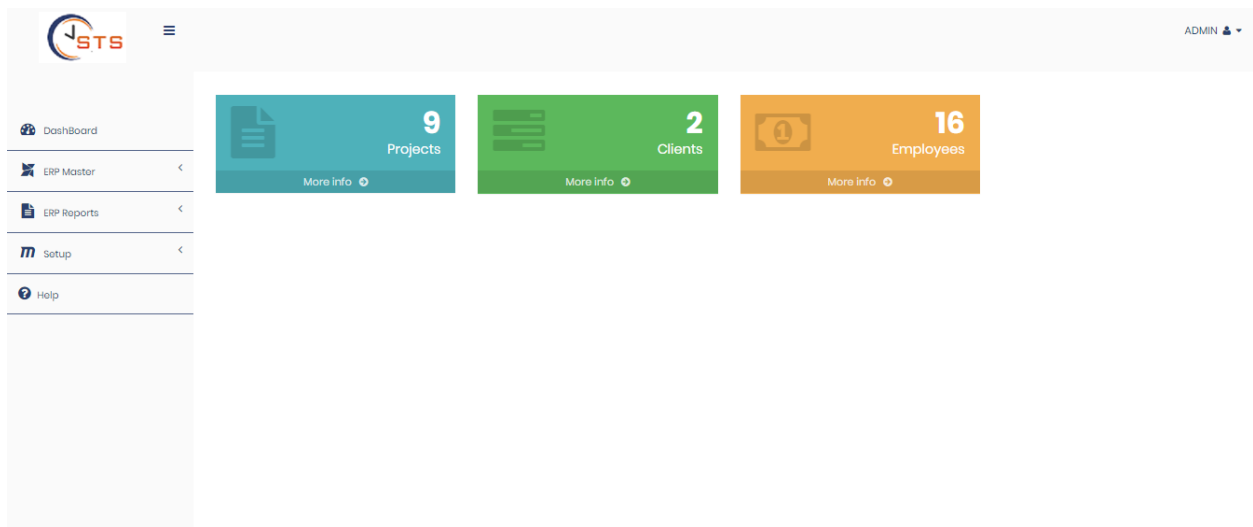

Fig 1.3 Dashboard

3. Under project section we can find all the projects that are being managed. The projects along with the project details like Project Id, Project Code, Project Name, Client Id, Start Date, End Date, and Project

Leader will be displayed when we click “More Info” present at the bottom of the Project Card. As shown in below figure 1.4 .

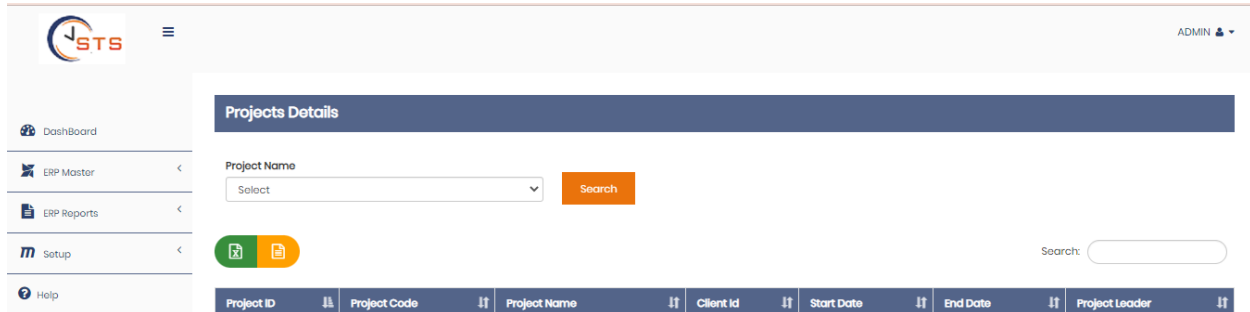

Fig 1.4 Project details

- As shown in below figure 2.4 we can see the dropdown Project Name, which will fetch the projects that are being managed. So to know the details of the particular project, from the dropdown select the corresponding name and click search. The details of the selected project will be displayed.

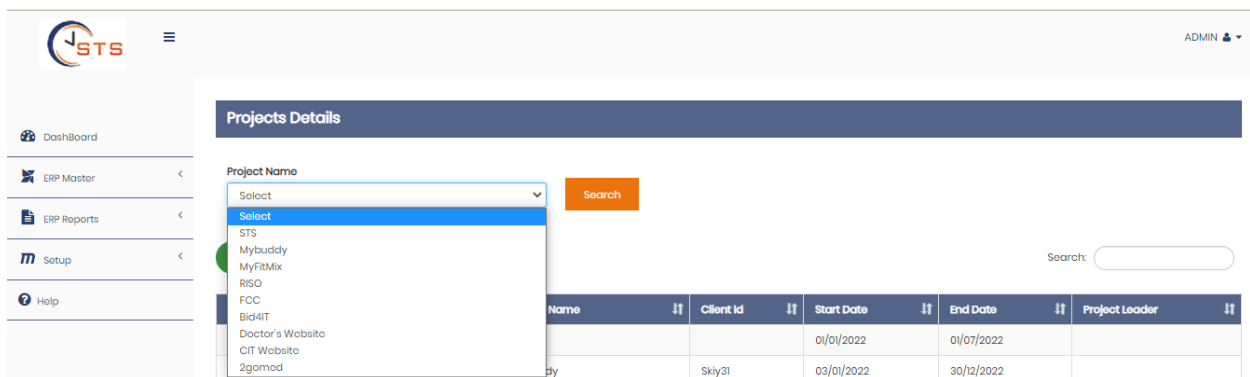

Fig 1.5 Project details (Dropdown)

CLIENTS

- Under clients we can find the count of client present in the organization as shown in below figure.

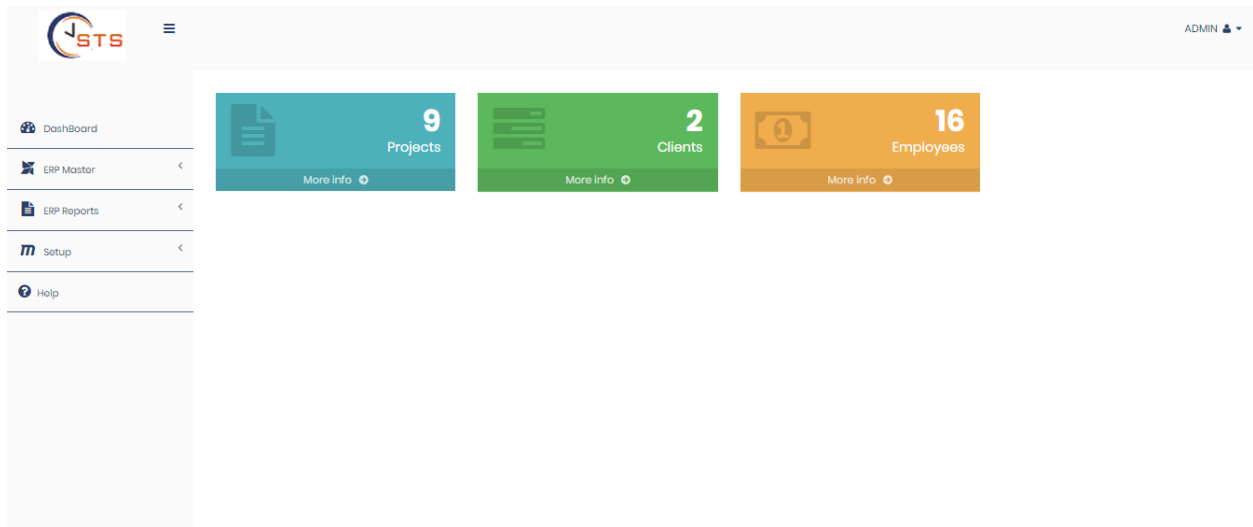

Fig 1.6 Dashboard

- When we click the “More info” button present at the bottom of the card, we can see the details of the client like client id, company name, reference, telephone number, fax, address, city, country, email id and the skype id as shown in below figure 1.7.

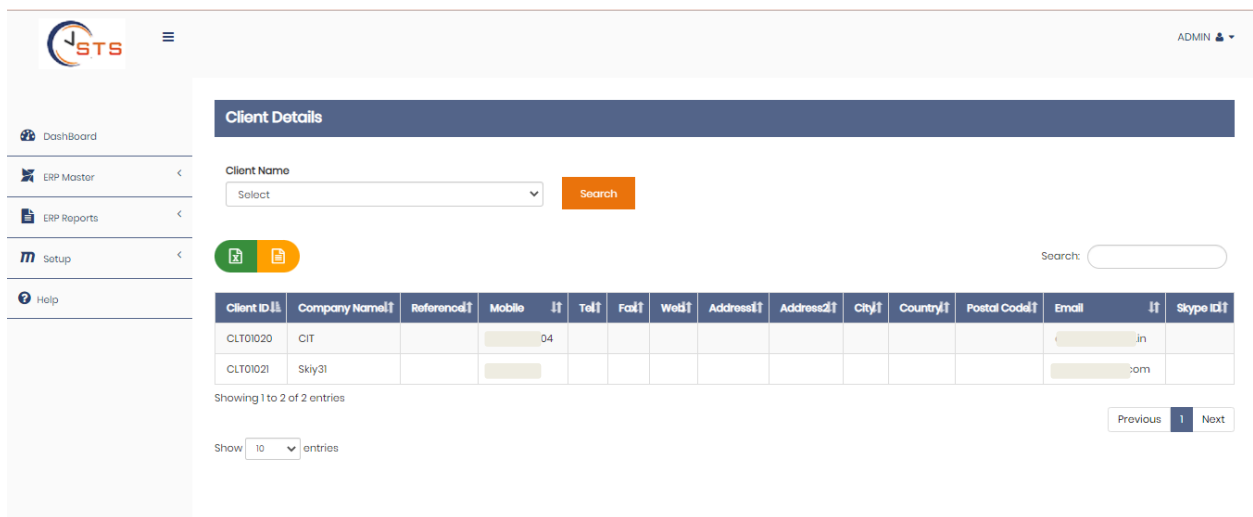

Fig 1.7 Client details

- In the figure 1.7 we can find a dropdown called Client Name. This dropdown will fetch all the client’s name present in the company. So, to

know the details of the particular client, just select the client's name from the dropdown and click Search. This will display the client's details.

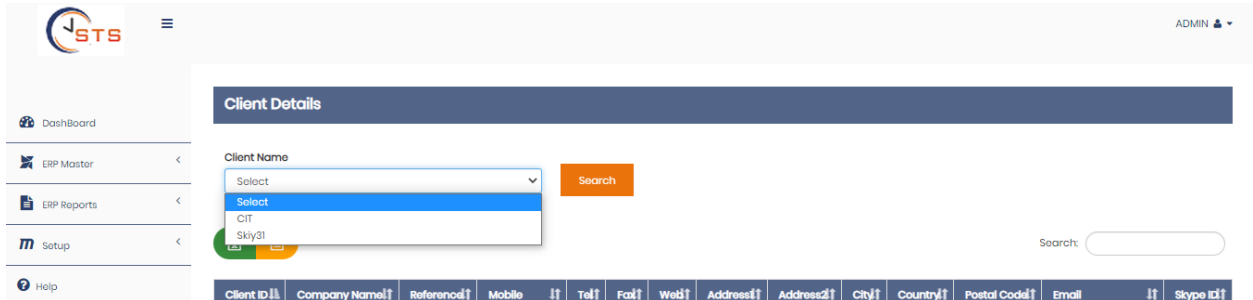

Fig 1.8 Client details (Dropdown)

EMPLOYEE

1. In employee card we can find the count of the employees working in the company.

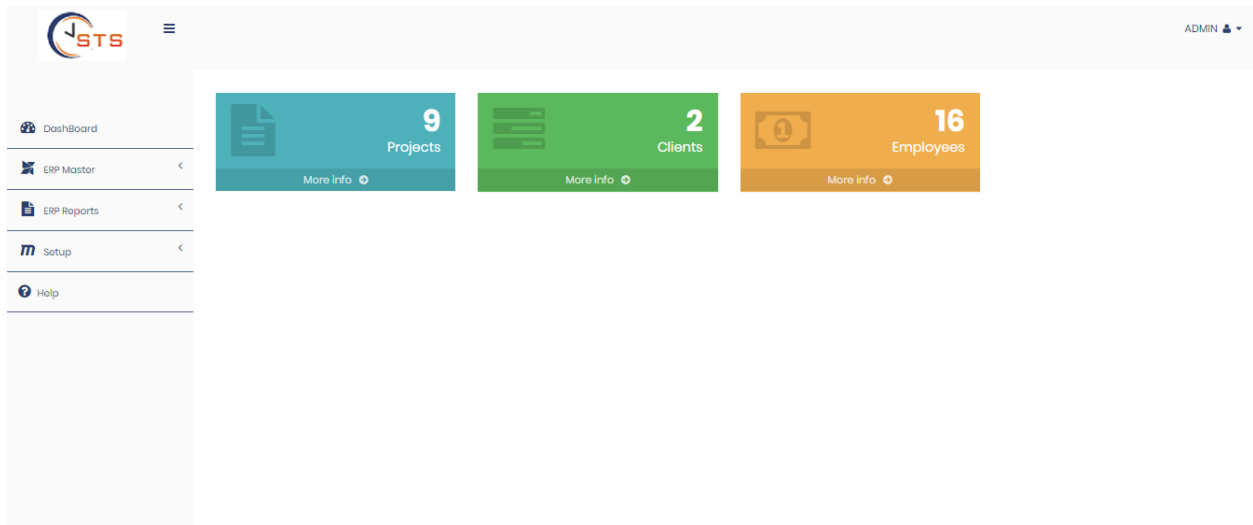

Fig 1.9 Dashboard

2. To know more details of the employee click the “More info” button present at the bottom of the card, we can see the details of the employee details like First name ,Last name, Nationality, Gender, Designation, Date of join ,Job group, Report manager, Email, Telephone number, Address, Salary ,Fax and Skype id as shown in below figure 1.10.

First Name	Last Name	Nationality	Date of Birth	Gender	Designation	Date of Join	Job Group	Report Manager	Email	Mobile	Tel	We
Admin							Admin		in			
Athira	Mohan	Indian	01/01/0001	Female	Project Manager	07/02/2022	Employee	Shafeek Abdul Salam	y31.de	1355

Fig 1.64 Company master

1.5.2 MENU MAPPING

In an organization we may contain different type of user groups. We can use Module Permission setup to set permission to each user group. Only the admin have the access to set this permission.

- To set permission select the group name from the dropdown and keep the checkbox checked under set permission column for the needed modules that should be visible for the corresponding user group's login. Refer fig 1.65
- After completing click save. Now the corresponding login will be visible with their respective modules

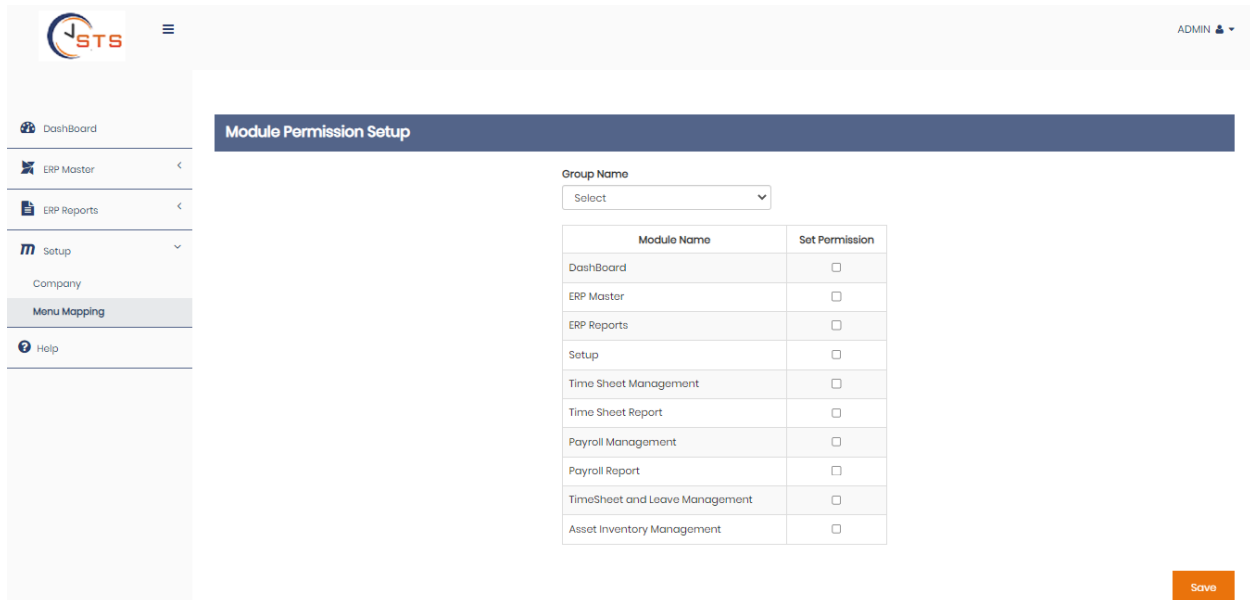

Fig 1.65 Module permission setup

1.6 HELP

If the users finds any difficulties while using the Smart Timesheet Website, this help module will be very useful for the user .The help module contains the User Manual of this Smart Time Sheet website which gives a clear explanation provided in a step by step manner along with the relevant images for the corresponding login. The users can download the manual from the website as shown in below figure.

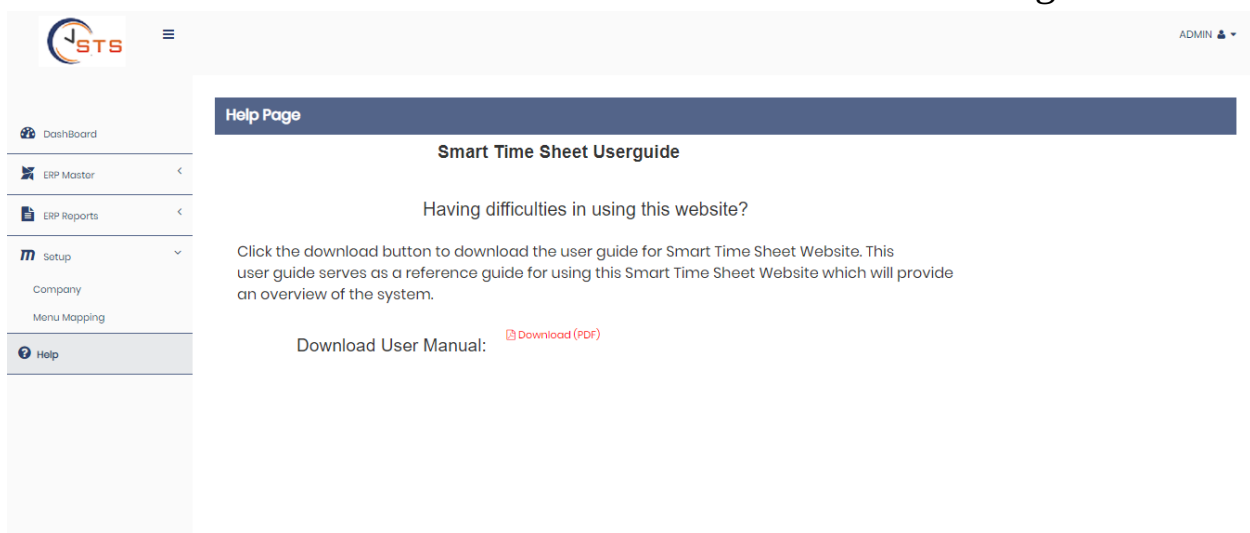

Fig 1.66: Help Page

To download the manual click download pdf button as shown in above figure. The User Manual will be downloaded in pdf format.

1.7 USERNAME

In the employee page, at top left corner we can find the user name along with a dropdown, when we click the dropdown we can find some options namely User profile, Change Password, Logout as shown in below figure.

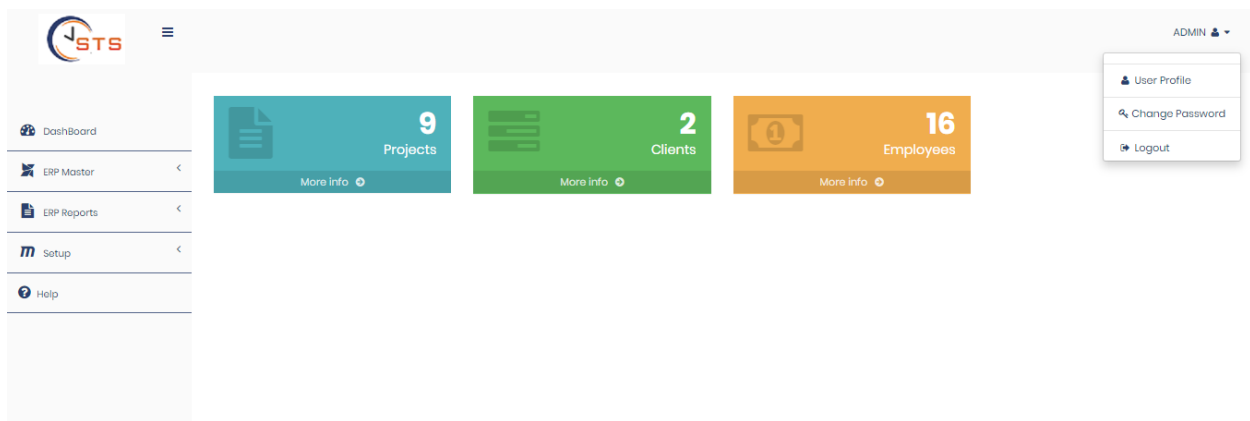

Fig 1.67: Username dropdown

1.7.1 User Profile

Under user profile section the user can find their details like Profile Image, User name, Personal information, Emergency Contact, Bank information as shown in below figure.

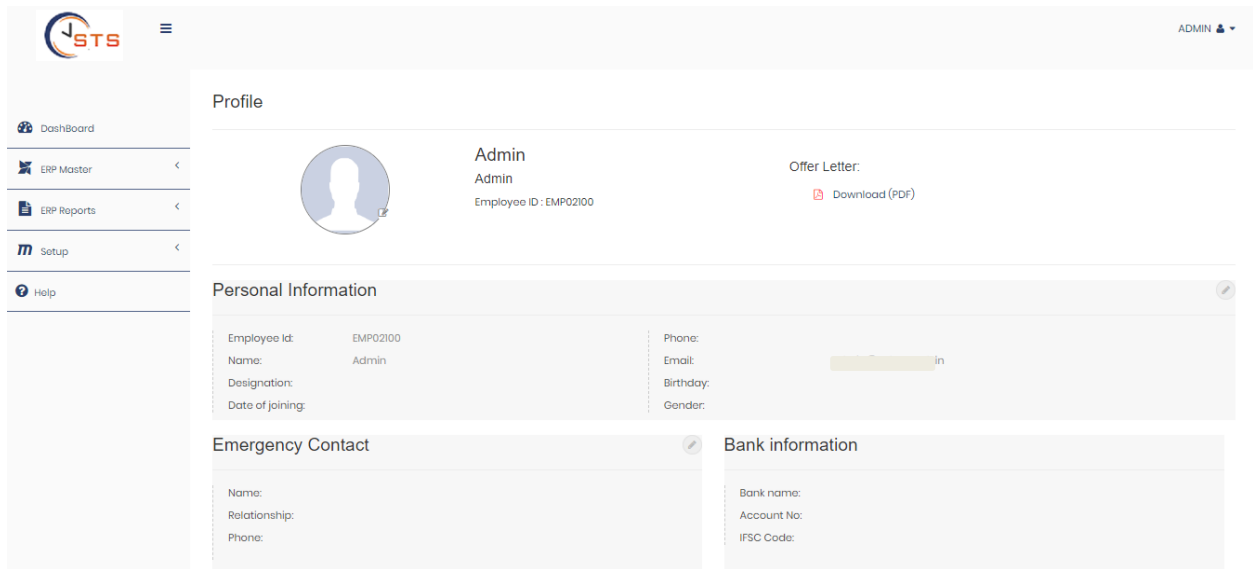

Fig1.68 User profile page.

Offer Letter:

The user can download their offer letter by clicking the Download pdf found in Profile Page, as shown in below figure.

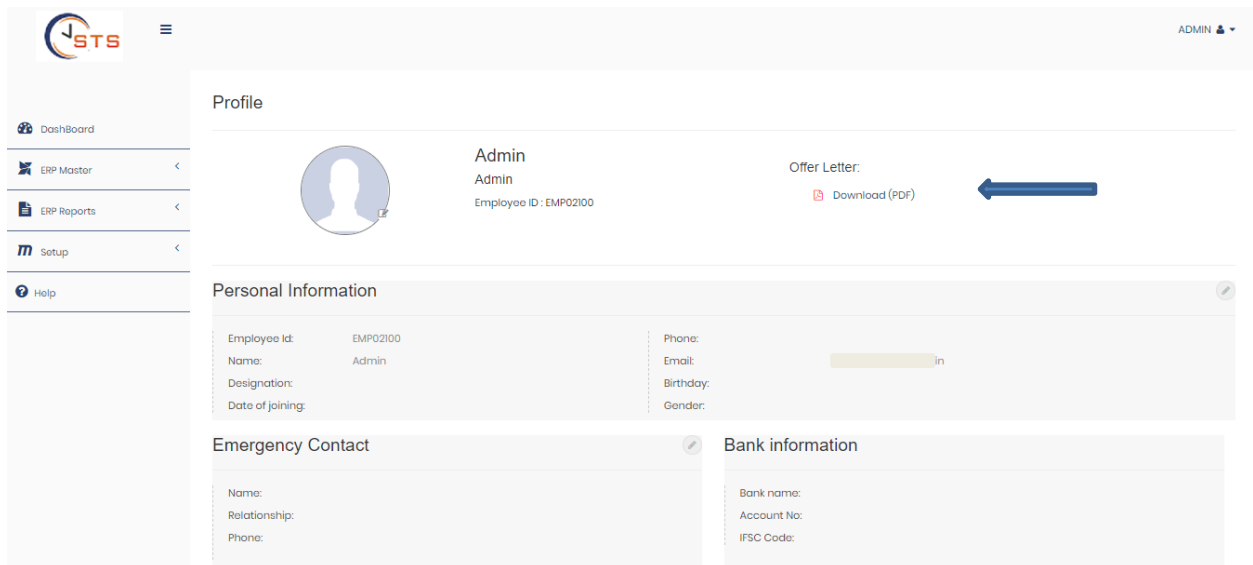

Fig 1.69 Download Offer Letter

Profile Picture

The user can set their profile image by clicking the edit icon present near the image shown in fig1.69. Edit page will be displayed to upload the picture as shown in below figure. The user can choose the image file and click upload. The image will be uploaded.

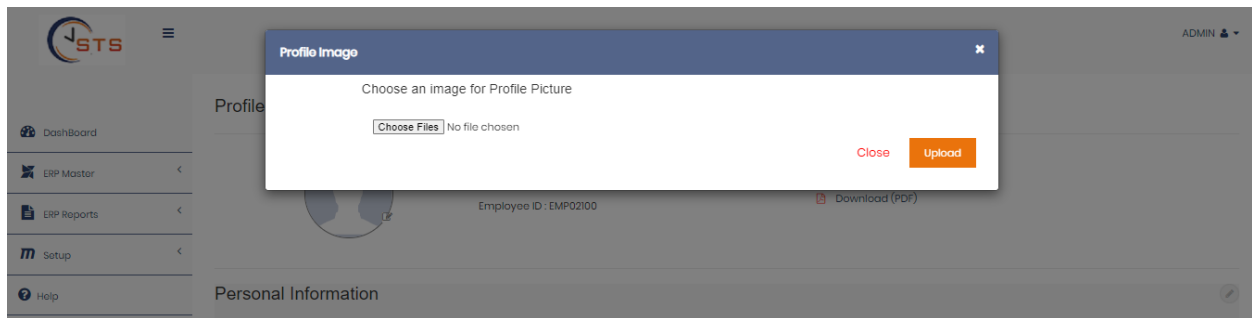

Fig 1.70 Profile Image Upload

Personal Information

Under personal information tab the user can find their personal information displayed in the card as shown in above figure. If the user wants to edit their personal information, the user can click the edit button present in the top of the personal information tab. The user can edit the details that are needed to be updated and click save the details will be updated.

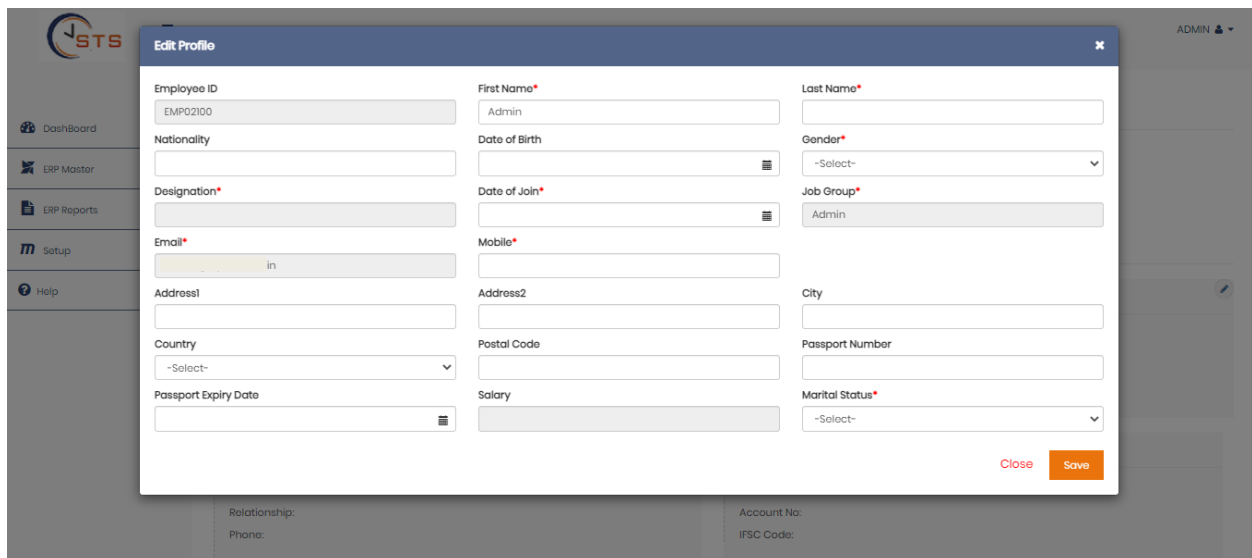

Fig 1.71 Edit Personal Details

Emergency Contact Information

Under emergency contact information tab the user can find their emergency information provided displayed in the card as shown in above figure. If the user wants to edit their emergency information, the user can click the edit button present in the top of the emergency contact information tab. The user can edit the details that are needed to be updated and click save the details will be updated.

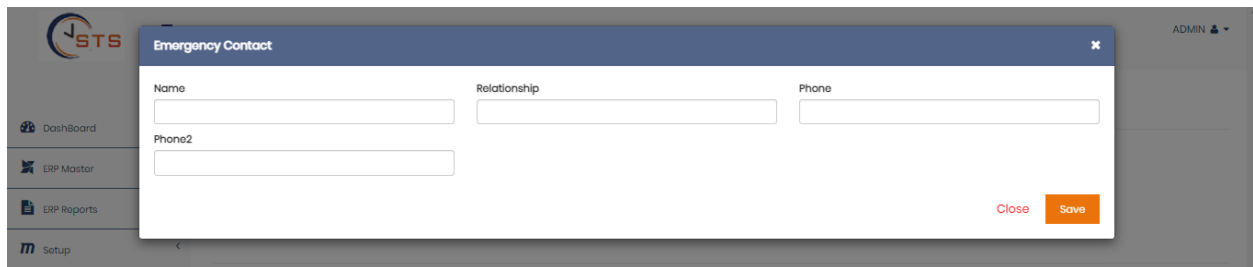

The image shows a web application interface with a sidebar on the left containing links to 'Dashboard', 'ERP Master', 'ERP Reports', and 'Setup'. The main content area displays a modal window titled 'Emergency Contact'. This modal contains four text input fields: 'Name', 'Relationship', 'Phone', and 'Phone2'. At the bottom right of the modal, there are two buttons: a red 'Close' button and an orange 'Save' button. The top right of the application shows a user profile icon and the text 'ADMIN'.

Fig 1.72 Edit Emergency Details

Bank Information

Bank Information will be displayed in the bank information tab. The user cannot edit the bank information as it can be updated only by the admin or HR manager.

1.7.2 Change Password

If the user wants to change the password, the user can click the change password option from the user name dropdown. When we click the change password option, a page will be displayed as shown in fig 1.32.

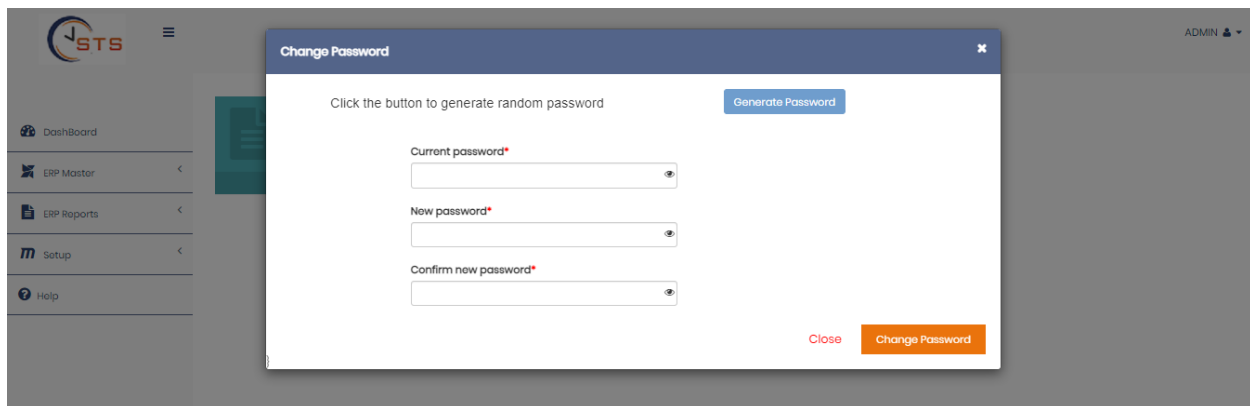

Fig 1.73 Change Password Page

As shown in above figure the change password page contains three fields where the user should enter the current password, New password and confirm new password (make sure that the new password and confirm new passwords are same). By clicking the generate password in change password page, a random password will be generated and will be filled automatically in new password and confirm new password fields as shown in below figure.

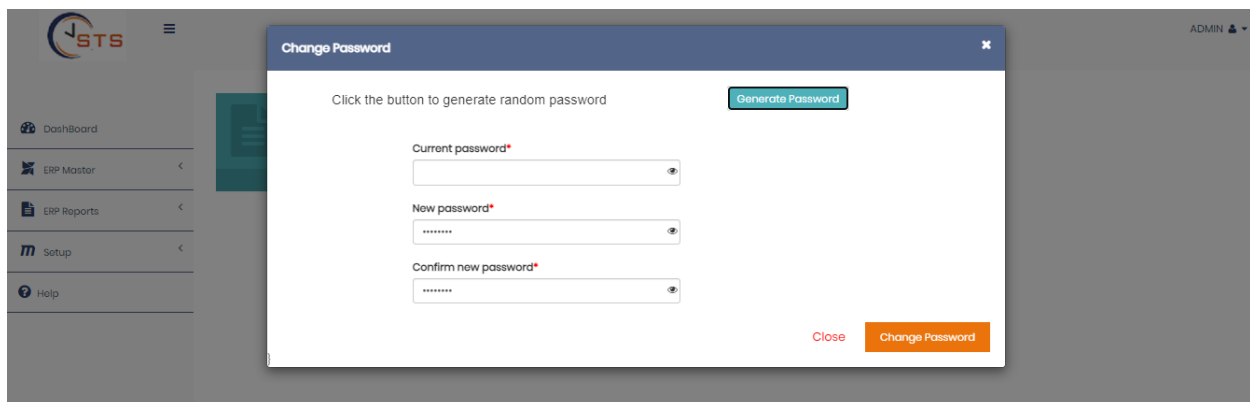

Fig 1.74 Generate password

Now click change password, new password will be created.

1.7.3 Logout

When we click logout from user name dropdown, it ends the access to the website and it returns to the login page of the STS website.
